

Here are several more photos of defect items I find everyday. My competition will market you with gimmick toys but moisture meters will not detect a leak if it hasn't rained!

Ask my competition to show you their defect photos in their reports. The builders are not going to make the repairs without photo documentation

I also perform pre-drywall inspections, pre-purchase inspections and used home inspections. If you have a friend or family member whom needs my services give them this mailer? Hope to hear from you. Ted Collins (703-777-9222)

I have clients who are doctors, lawyers, electrical engineers, CEO's and etc. who thought they knew everything about the house until they hired me. Don't fall into that trap. You cannot begin to inspect the house yourself the house is complicated!
